ESCP
Quick Facts

6 European campuses in Berlin, London, Madrid, Paris, Turin, and Warsaw

Multi-accredited:
AACSB, EQUIS, EFMD MBA, EFMD EMBA, 5 European Higher Ed Standards

A comprehensive **portfolio** of 46 programmes: Bachelor, MiM, 27 Specialised Masters, MBA, 2 PhDs, 12 Executive Masters, EMBA, Global EPhD, as well as a custom and open programme offer

8,000+ students in degree programmes representing

122 nationalities

The World's **1st** Business School (est. 1819)

170 research-active professors representing over 33 nationalities across our campuses

Over **140** academic alliances in Europe and the world in 47 countries

5,000 high-level participants in customised trainings and executive education

68,000+ active alumni in over 150 countries in the world

6 Urban Campuses

BERLIN

The Berlin campus is situated in the western part of the city centre, near the Charlottenburg Palace and its splendid gardens. Berlin is a fast-growing city characterised by a rich multifaceted economic structure and culture.

LONDON

Located in West Hampstead in North-West London, this campus offers students state-of-the-art facilities in a traditional Victorian building.

MADRID

The Madrid Campus is located in the exclusive neighborhood of Puerta de Hierro, 10 minutes away from the city centre. Madrid is one of the most visited cities in Europe, with an exceptional lifestyle, an incredible gastronomy and thousands of places to visit. Most importantly, Madrid is one of the leading business and innovation hubs in Europe.

PARIS

République & Montparnasse

The Paris sites are conveniently located in the centre of the city. They enjoy easy access to all of the capital's major business districts.

TURIN

The Turin campus is located in a beautiful building with modern facilities. Turin is one of the main business centres of the Italian economy and home to many architectural masterpieces.

WARSAW

Our campus is based at Kozminski University, located in Warsaw's northeast district of Praga Północ. It is one of the city's most historic neighbourhoods.

ESCP
It all starts here

In a world shaped by the economy, reorienting how this world evolves has become a duty of the sphere
of business.

It's by giving meaning to business that we will be able to nurture society in a positive and sustainable way. As a business school training leaders and entrepreneurs for more than 200 years, our role is central in teaching how to better anticipate change, and make decisions.

Because, in life as in business, everything starts with choices.

It is by making such choices that ESCP Business School upholds its values, its unique management style and its unique point of view on the world.

The era of responsible, augmented and collaborative leadership has arrived: a leadership aware of global issues, sustained by our values rooted in European humanism, our unrivalled worldwide diversity and multiculturalism.

Joining the international ESCP community is beyond embracing academic excellence; it is about learning how to make enlightened choices to be ready to meet the great challenges of our times with optimism.

Yes, with optimism because, like ESCP's founding fathers in 1819, we believe in progress.

We constantly explore new knowledge territories from sciences to humanities, allowing our graduates to reach a new level of insight and to engage with intelligence and responsibility.

For a successful career with a positive footprint, choose ESCP Business School. **It all starts here**.

Prof. Frank Bournois
Executive President &
Dean of ESCP

Prof. Régis Coeurderoy
Dean of the Ph.D. programme

We have developed a four-year programme that is demanding but helps each student to reach international standards of research quality. The first year allows students to develop their theoretical and methodological knowledge while establishing the fundamentals of their thesis topic. It allows students, at their own pace, to build a customised research identity.
The second year allows students to complete their theoretical and methodological knowledge according to the research project, but above all to develop the empirical research process.
The third year is when the first results are presented and discussed in seminars and international conferences. Finally, the fourth year consolidates and finalises the work and paves the way for the first international submissions to A-rank journals.

This curriculum is not individual, it is collective. You benefit from the support and exchanges of an excellent international faculty. We accompany your training in doctoral courses; we develop intense supervision; we support your international academic experiences; and we promote learning through co-authorship. Last, but not least, we offer a stable and highly competitive research environment in terms of funding.

We want to train fully-fledged future researchers and academics, aware of the challenges of a high-level academic career: we allow you to teach a few hours and to participate in the school's activities as early as the second year. Others can develop their research in conjunction with partner companies.

Our doctoral programme offers you five possible paths: Accounting and Management Control; Finance; Information & Operation Innovation; Management & Organisation; Marketing. Whatever your choice, we guarantee a stimulating environment that is geared towards the advancement of all. Our colleagues are already looking forward to meeting you!

A Diverse International Faculty

The ESCP Faculty endeavours to inspire students and help them take their first step towards an ambitious and exciting international career in today's diverse, multicultural business world.

Prof. Dr. Marion Festing

HRM and Intercultural Leadership

BERLIN CAMPUS

"The study of management in mixed groups at different campuses allows students to experience and practice cultural diversity, sharpen their international profile and prepare for the demands of a globalised economy."

Prof. Philippe Zarlowski

Management Control

PARIS CAMPUS

"Students are ESCP's wealth. The diversity of their backgrounds together with their commitment to their studies make each course an original learning experience that prepares them to take on responsibilities in a fast-changing and complex world."

Prof. Terence Tse

Finance

LONDON CAMPUS

"Combining students' abilities to grasp and apply the concepts, with their maturity as well as their diverse cultural and business backgrounds, the grand result is a recipe that guarantees wonderful class discussions and a superb preparation for their future careers."

Prof. Chiara Succi

Organisational Behaviour

TURIN CAMPUS

"Every time I teach ESCP students, I learn something new. Their varied backgrounds, cultures and experiences allow discussions to cover many different points of view and deeply explore the content."

Prof. Lorena Blasco-Arcas

Marketing

MADRID CAMPUS

"Multiculturalism, humanistic values and learning by doing define the ESCP experience, the perfect combination to prepare our students for the societal and businesses demands of the future."

Prof. Grzegorz Mazurek

Marketing

WARSAW CAMPUS

"ESCP with its history and pan-European perspective is associated not only with a high quality of teaching, superb knowledge and unique skills, but an amazing mixture of intercultural values which can be simply defined as the 'ESCP experience' – students are aware of that, appreciate it and take the most from it."

ERIM

ESCP Research Institute of Management is a state-recognised research laboratory that allows ESCP not only to deliver a Doctorate degree independently but also to apply for national research funding such as the ANR funding. ERIM also plays an important role in promoting research activities of ESCP Business School.

FULL TIME PH.D. PROGRAMME

Your choice, **our mission**

Why a Ph.D. ?

Why commit to a 4-year curriculum, so demanding, so risky at times and so different from the majority of your school mates? Why leave the comfortable paths that your master's studies allow you to take? Yes, why?

At ESCP BS, we prefer to say "why not"? Why not enter terra incognita and discover new directions? Why not take the risk of questioning established frames of thought, dare to debate them and one day contribute to their advancement? Why not make the effort to integrate the most advanced research methodologies and bring new results that will improve our knowledge and practices? Why not go through the looking glass?

There are not only the people who want to follow the well-trodden paths. There are a few who want to pursue the adventure and break new grounds. And if you're reading this, it's because, somewhere along the line, you are perhaps one of those few.

We believe that this is a personal adventure to be attempted because it responds even more today to multiple expectations by diverse communities. The academic community aspires to integrate curious and reflective minds that contribute to the development of the frontiers of knowledge. Furthermore, the business world is gradually realising that it needs collaborators trained to go further into business knowledge in order to meet today's complex societal challenges.

For these reasons, we conceive our mission as follows: "Educate and train future top international researchers - ambassadors of ESCP research excellence, future peers and collaborators in research".

Our programme **values**

Knowledge Diversity

Doing the Ph.D. programme gives you an opportunity to invest in one of our five specialisation tracks. You will be able to explore a methodological perspective, or maybe even two! In addition, we also foster transversal initiatives across knowledge fields and methodologies. We value exchanges with PhD students from our Berlin campus and we actively support international exposure of our students.

Research Collaboration

If research is sometimes considered as an individual, even solitary, activity, at ESCP you will be part of a research community encompassing our six European campuses. During your four year curriculum, you benefit from close supervision in departments and you will learn through co-writing with the faculty staff. Your success is our success, and vice versa.

Professional Ambition

Doing the ESCP programme gives you the opportunity to open new and ambitious professional horizons. Whatever your post doctorate objectives - joining the academic or the business research world-, we support your willingness to go “one step further”. Joining a top university research team; boosting the R&D activities of a cutting-edge organisation – why not?

Key Facts

Your doctoral journey
Curriculum overview

YEAR 1

Core Courses

(all students)

- Epistemology
- Research Design

Your choice among five specialisation tracks

Finance	Information & Operation Innovation	Accounting & Management Control	Management & Organisation	Marketing

Three Methodological Tracks

- Econometrics
- Quantitative Methods
- Qualitative Methods

Summer Paper

YEAR 2

Professional Seminars

- Writing Workshops
- Art of Teaching

Finance	Information & Operation Innovation	Accounting & Management Control	Management & Organisation	Marketing

YEAR 3

- Personal Branding

Outside the Walls

Develop your research and teaching skills
Present your papers in conferences
Go on a research visit abroad

YEAR 4

- Placement

Thesis Completion

Areas of specialisation

When applying to the programme, you need to express your interest for one of our five specialisations:

- **Finance:**

Corporate finance, asset pricing and banking. Students are trained to apply econometric methods but also to develop theoretical models

- **Information & Operation Innovation:**

Management science and data analysis. Students are trained to tackle a variety of key issues like new technologies and emerging business models, value chain optimisation, business analytics or sustainability

- **Accounting & Management Control:**

Social studies of accounting. Students are trained in qualitative and/or quantitative techniques and they unpack the control and performance management issues facing organisations

- **Management & Organisation:**

Strategy, organisation, human resource, and organisational change. Students are trained in quantitative and/or qualitative techniques and tackle issues from competitive analysis to the study of individual behaviors

- **Marketing:**

Consumer behavior, branding, planning and promotion, channel management, and digital marketing. Students are trained in quantitative and/or qualitative techniques to tackle issues pertaining to consumer, corporate and organisational phenomena

Ph. D.
Structure

The curriculum is organised over a maximum of four years.

Year one constitutes the foundation of your doctoral training. It is based on the following three pillars:

- A reinforcement of your theoretical knowledge in the field of specialisation of your choice (120 hours)
- A reinforcement of your methodological knowledge in one of three possible options (120 hours)
- An in-depth work of problematization which sets the determining elements of your thesis project that you will develop during the following three years ("Summer Paper").

Year two completes your training according to your research orientations. It is focused on the development and operationalisation of your thesis project. This process is developed under close supervision and through integration into group workshops that allow you to pace your progress. This is also the year of your first drafts with a view to submission to academic conferences and workshops.

Year three is the year that allows you to test your ideas, your models, and your results in your research communities. This is the ideal time to exchange ideas at international conferences and to possibly develop new connections through visiting.

Year four allows you to finalise your research until the final defense of your project in front of the jury. This is also the year when you may start submitting your first draft paper for peer review, while exploring your placement opportunities.

Within this typical curriculum, each Ph.D. candidate's programme is customised according to their background and knowledge, to the content and requirements of their research project and to their individual situation.

Each student curriculum may also be enriched with courses from other specializations in the programme or other academic institutions.

Outside the **Walls**

Conferences

If you join the doctoral programme, academic conferences will become an important part of your research life.

Conferences are key landmarks in the Ph.D. curriculum and offer great opportunities to promote and improve your work and build your academic career.

At ESCP, we value the active participation of our students in these events and make sure to offer the technical and financial support needed to fully participate in conferences.

We strongly encourage our students to present their work and to benefit from their peers' valuable feedback to further their thinking. As such, our students participate every year in a wide range of distinguished conferences in different disciplines: Academy of Management, Babson College Entrepreneurship Research Conference, Financial Management Association Annual Meeting... among many others.

Research stays abroad

Our students are highly encouraged to complete research stays abroad at renowned universities and research centers to consolidate their research efforts and strengthen the international dimension of their doctoral project.

These visits are more and more popular among students and we believe that they are not only a great source of inspiration and exchange, but represent a unique opportunity to deepen the doctoral project.

As they are promoted by universities around the world, there are many opportunities for stays. By joining Bocconi University, UC Berkeley, Oxford University or the London School of Economics, to name a few, our students have been able to integrate a stimulating research environment, consider new perspectives and develop their network of contacts.

Marina Leban

Ph.D. 2020

Post-doc in Marketing at Copenhagen Business School

During my third year I was invited to spend 12 months at the Department of Marketing - Copenhagen Business School. I worked alongside Professors there on my second thesis paper. This collaboration was very fruitful as the paper was published in the Journal of Business Ethics. I stayed in close contact with colleagues at the department after my visiting, and eventually got a position as a postdoctoral fellow.
This new privileged position as postdoc allows me to build a strong research foundation for my academic career.

Nora Meziani

Ph.D. 2016

Lecturer, University of Liverpool

The ESCP Ph.D. Programme helped us develop our professional and intellectual trajectory in our own style and provided unique support to develop our international network and academic excellence. For instance, in addition to receiving financial support to present my work at international conferences, I was strongly encouraged to visit top scholars abroad.
This international experience has been a key pathway to find my first job in Canada, and then develop my career in the UK.

Career Development **and Placement**

Once you graduate, the ESCP Ph.D., as a pledge of excellence, will be an asset in achieving your professional ambitions.

Our graduates go on to successful careers in prestigious universities, research centers, companies and organisations. Whether in academia, in the private sector or in the field of development, ESCP Ph.D.s pursue their careers in France and abroad, working in some twenty countries and perpetuating ESCP's culture of openness.

Overall, our alumni have chosen an academic career (+80%). As distinguished researchers in several disciplines, they have joined the best business and engineering schools, and universities.
We are very proud to count among our Ph.D. holders, lecturers, researchers, and postdoctoral fellows who joined top schools worldwide:

- **Europe:** The UK, France, Denmark, Italy, Spain, Portugal, Switzerland
- **North America and Oceania:** Canada, United States, New Zealand
- **Latin America:** Mexico, Argentina, Colombia, Chile
- **Africa and Middle East:** Morocco, Tunisia, Lebanon
- **Asia:** Vietnam, Kazakhstan

Those of our alumni who have chosen to apply their doctoral knowledge and skills in the business sector lead successful careers in sectors such as finance and banking where a Ph.D. is an asset.

Paul Caussat

Ph.D. 2018

Lecturer in International Business,
Royal Holloway University of London

I started my first job in academia as a Lecturer in International Business at the University of Greenwich (UK), while I was still writing my Ph.D. dissertation.
One year after obtaining my PhD, I joined Royal Holloway University of London.
I'd like to thank ESCP for equipping me with the relevant skills for the international academic job market!

We are also proud that our doctoral students have received awards for their work.

Among the most recent ones:

Thesis awards

Liliane Cabrini Carmagnac
won the **2021 AIRL-SCM Prize** for the best thesis in logistics and supply chain management.

"A critical perspective on collective arrangements tackling wicked problems in global supply networks: The case of the Roundtable on Sustainable Palm Oil".

Supervisors: Valentina Carbone & Valérie Moatti

Pierre Lescoat
won the **2020 FNEGE Prize** for the best transdisciplinary thesis.

"The value of the individual in the trading room".

Supervisor: Claire Dambrin

Paper awards

Anna Souakri with Régis Coeurderoy (supervisor) & Andrew Zacharakis (Babson College)
won the **2019 BCERC Award for Excellence in Research on the General Topic in Entrepreneurship** (Babson College Entrepreneurship Research Conference) for the article untitled:

"Does Entrepreneurial Experience Really Matter in Venture Capitalists' Screening Decisions? Preferences and Similarity-attraction in the VC-lead Entrepreneur Dyad".

Moyra Marval
won the **Roland Calori Prize** for the article untitled:

"Understanding strategies for managing institutional complexity: the case of business accelerators".

AIMS Conference

Professional Workshops

After our doctoral programme, most students tend to choose an academic career.

Researchers engaged in a business career are also very eager to teach in academic institutions.
While teaching is a life-long learning process, through practice, innovative knowledge, pedagogy learning, and exchange with the academic community, we put our students in the saddle by familiarising them with the specificities of the job, and preparing them to start teaching with confidence through dedicated training and simulation workshops.

Excellence in teaching is part of the ESCP DNA and learning by doing is key. From year 2, you will have the opportunity to get involved in teaching and tutoring activities in our different programmes – from bachelor to master degrees.

The doctoral programme offers many possibilities to prepare for your future career.

The professors', researchers' and practitioners' testimonies will give you a better understanding of the job market and its characteristics and will enable you to make the best decisions for your career development.

Points of **View**

Alumni

José Martin Flores
Ph.D. 2019
Assistant Professor in Finance, Colegio Universitario de Estudios Financieros, Madrid

After defending my dissertation in June 2019, I joined CUNEF, a school located in Madrid, as a tenure-track assistant professor of finance. Being in a tenure-track position is challenging but rewarding.
Schools such as CUNEF expect assistant professors to publish a number of papers in top finance and economics journals in a period of 6 years before deciding whether you become a tenured professor.
Thanks to the skills gained during my PhD at the ESCP, I have been able to write (and publish) academic papers that will, hopefully, allow me to succeed in this journey.

Pénélope Van den Bussche
Ph.D. 2019
Lecturer, Université Paris Dauphine

I spent 4 years in the ESCP PhD programme during which I benefited from a full scholarship. This enabled me to complete my dissertation in the best conditions. I defended in September 2019 and started a position right away as an Assistant Professor in Accounting at TBS Business School in Toulouse (France). I left at the end of the year to start a position in September 2020 at Paris Dauphine University, a French public higher education institution.
My time at ESCP PhD programme enabled me to attend national and international conferences and complete a visiting in Denmark, which were great assets on the job market. My experience of teaching undergrad and grad students in both French and English at ESCP was also key in making my profile stand out.

Current students

Huihui Chi
Information & Operation Innovation

I have been studying at ESCP for 4 years now. I really enjoy my time here and it's a pleasant experience to study and work with my supervisor and other classmates.
The school has provided lots of opportunities and resources to students, such as conferences and research seminars.
My supervisor is very accessible and reliable. He has helped a lot in my academic life.
The school is also international and open-minded, which enables me to communicate and cooperate with different people.

Josiane Zhang
Turning Points Chair by Cartier

As a politics and economics graduate and an artistically-driven person, I found in ESCP the creative space I needed to both channel my interests into the perfect topic for my thesis, and develop my skills into truly competitive assets in the corporate arena.
The support I have been receiving from my supervisor is beyond par. I have found in him, and in the top management team at Cartier, invaluable mentors.
From the start, I have been entrusted with a great amount of independence through both the PhD Programme and the Cartier Chair at ESCP, for which I am deeply grateful.

How to **Apply**

Admission Process

The admission process is composed of 3 steps:

1. The official online application process: completion of the application form by candidates, before the deadline specified in the Admission Calendar, and provision of the required documents.
2. Candidates selected by the admissions jury after a first screening will have half an hour to present their background and motivation to the interview panel made up of programme director and faculty members. Alternatively, a Video interview can be offered to candidates.
3. After the interview the selected candidates receive the admission decision of the final selection Committee. Admitted candidates must confirm their acceptance by the deadline indicated in the offer letter.

At the end of the process, only applicants with secure funding will be confirmed.

List of Required documents

- ◯ Motivation letter
- ◯ Up to date resume
- ◯ **Research Statement** (1500-2000 words)
- ◯ 3 recommendation letters (a minimum of 2 academics and 1 professional if relevant)
  *You may download the template **here***
- ◯ Copies of diplomas and degrees,
- ◯ Transcripts of most recent degrees,
- ◯ IELTS or TOEFL results as a proof of English language proficiency (required score: IELTS 7, TOEFL 100). Both TOEFL (Test of English as a Foreign Language) and IELTS are serving as a proof of a good working knowledge in English. Non-native English speakers applying to the programme are required to take the test unless they have a university degree from an institution located in an English-speaking country. Test score should not be older than 4 years to be acceptable.
- ◯ Any research material that might be useful (dissertation, paper...) in .pdf format,
- ◯ Copy of your ID or passport,
- ◯ 1 digital photo,
- ◯ Application fees (50€) and payment agreement

The research statement (around 4-5 pages long) should give you the opportunity to present a research topic you would like to study.

This research topic does not necessarily commit you once for and for all and leaves room for possible re-orientations. It must however, give you the opportunity to make a first academic contribution - i.e to present a topic with a research question, elements of theory to address your research question, and a first idea of your research design.

Your research statement should specify the following points:

- what your research issue is;
- why this research issue makes sense (theoretical perspective);
- why this research issue is relevant (empirical perspective);
- what your research design could be.

This research statement really matters to optimise the match between your objectives and the requirements of a Ph.D. thesis. Of course, we are aware that you are at the beginning of the process.
That is why during your first year you are free to consolidate, modify and sometimes redraft your research project.

Your motivation letter will help the jury to understand better what your expectations are, and how you see your evolution in the programme and beyond.
Entering a post-master programme for four years is a huge decision. We need to be mutually convinced that it is really the right choice for you.

Do not forget to justify your choice of specialisation or indicate whether you are still open to different options.

Financing

Fees

Tuition fees: €10.500/year

We offer a full tuition waiver to Ph.D. students eligible for a ESCP doctoral scholarship.
However, a legal token registration fee of ± 400€ per year for the Doctoral School applies.

ESCP Scholarship

ESCP finances a significant proportion of admitted Ph.D. students with a scholarship guaranteed for 4 years.
The first year is supported by a scholarship of €21,500, with a possible extension of €1,500 in tutoring (based upon the evaluation of the student's personal workload). From the 2nd year, this scholarship is combined with a doctoral contract including teaching, tutoring and research assistance for a total amount of €23.000 per year.

	1st year	2nd year to 4th year
Scholarship	€21,500	€18,000
Doctoral Contract	€1,500	€5,000

External fundings

CIFRE (Conventions Industrielles de Formation par la Recherche)
These agreements bring together three partners: a company, a Ph.D. student and a University around a research project, which will lead to a doctoral thesis. The company benefits from an ANRT (Association Nationale Recherche Technologies) subsidy for hiring a Ph.D. student for three years.

Research Projects: Another possibility is the financing of the Ph.D. scholarship by a research project developed in collaboration with one or several companies. The research project can be a stand alone initiative or supported by one of our chairs at ESCP.

Financial aid from the French Government: In addition to the financial aid for which they are eligible in their country of origin, non-French students can seek grants from the French Ministry of Foreign Affairs. Requests should be sent to the Cultural Department of the French Embassy in the student's country of origin. Ph.D. students can also apply for European exchange programme grants (Socrates, Erasmus, Phare). This aid cannot be combined with the ESCP scholarship.

ESCP BUSINESS SCHOOL FOUNDATION

ESCP Foundation

Launched by the alumni in 2005, the ESCP Foundation became a public utility foundation by a decree.

The Foundation's aim is to support the ambitions and the academic excellence of ESCP through four initiatives:

- **Diversity and international appeal**
- **High-level research**
- **Teaching innovation**
- **Influence of ESCP worldwide**
